**Subject:** 1326 Allston Way (Corp Yard) - issue of contamination

Regarding the issue of contamination raised by Mr. Woznaik and echoed by Ms. Maio at the Nov 18th Council Meeting.

I believe that the Yard is paved with asphalt except for parts along the western edge. While this may add to the noise problem, it may protect the ground from the contamination problem.

Possibly someone from the Public Works could assess the situation at the yard, and supply the council with an estimate of the risk of contamination being an issue should the council desire to explore the sale of the yard for residential development.

Thanks.
